**Please install this product
with two or more people**

For information or questions visit:

2

CEILING ATTACHMENT

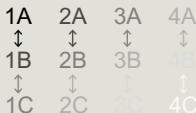

Attach the **ceiling attachment upper parts** in one straight line against the ceiling with a distance of 410 mm. **The first ceiling attachment upper part starts 205mm** from left or right side of the screen. Use the right fastening materials for the right ceiling*.

3

CONNECTING THE FRAMES

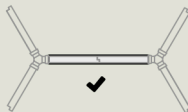

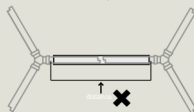

- 1 - Connector consists of two parts
- 2- Connect the frames vertical together with the connection tubes

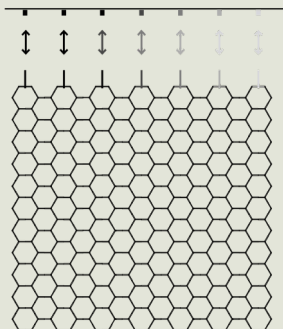

- 3 - Connect the frames horizontal together with the connection tubes

The amount of frame parts depend on the size of your divider.

4

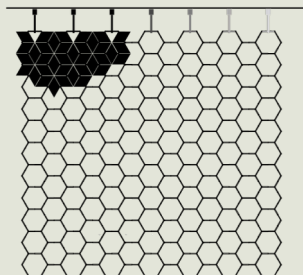

PLACING THE FRAME

Place the frame in the ceiling attachment upper parts and secure with an imbus key. Be careful, very fragile. Do this step with enough people to hold it steady!

Make sure that if the screw is left on the outside, it means that the screw is not properly aligned in the picture. If it disappears completely, then it is properly aligned.*

5

PLACING THE FACETS

1 - Fill the frame with the facets. Start at the top and work your way down to the bottom.

2 - Your Facet divider is ready!

Make sure that the facets are closed over the whole side, all 12 lockpoints, otherwise the frame will not be secured and may fall apart. If a facet doesn't close properly this is occurred because a frame connection isn't closed properly.*

Do The Fitting By Placing The A A₂ Pieces Written Below Face To Face
